

BUY BACK PROGRAM

Recover Value from Your Decommissioned IT Assets

Maintech helps organizations unlock the value sitting in decommissioned IT equipment by connecting you with trusted buyers and managing the entire process end to end. We deliver competitive market pricing, certified data handling, and a single point of accountability, so your team can focus on higher-value priorities.

Recover Maximum Value

Secure, End-to-End Handling

Sustainability Built In

MAINTeCH

What This Means for You

Generate Immediate Return

Turn decommissioned servers and infrastructure into cash, releasing capital tied up in unused equipment.

Simplify Decommissioning

Avoid the time and complexity of sourcing buyers or managing resale in-house.

Secure Data Handling

Every asset undergoes certified data wiping or physical destruction, with a full chain of custody documentation.

Reduce Storage and Overhead

Free up space and eliminate the burden of holding unused equipment on your books.

Support Sustainability Goals

Extend the lifecycle of hardware through reuse and responsible recycling, contributing to your ESG reporting.

How It Works

Asset Audit

Share the details of your decommissioned equipment, covering servers, storage, and network equipment, to build a complete inventory.

Market-Based Pricing

Receive a competitive quote informed by current secondary market demand and equipment condition.

Buyer Matching

Maintech connects you with vetted buyers actively seeking these assets.

Secure Collection and Processing

Our team manages logistics, transport, and certified data handling, providing a fully managed, hassle-free process.

Payment

Receive payment quickly, with clear documentation at every stage.

Why This Works in Your Favor

Current market conditions are driving strong demand for refurbished infrastructure, which directly benefits you:

- **Maximize Return on Decommissioned Assets.** Ongoing budget pressures are increasing demand for cost-effective alternatives to new hardware.
- **Benefit from Pricing Volatility.** Rising and unpredictable hardware costs are strengthening the resale market.
- **Capitalize on Supply Shortages.** Delays and limited availability of new equipment make decommissioned hardware more valuable.
- **Support Sustainability Initiatives.** Demand for reuse and lifecycle extension continues to grow across the channel.

The result is clear:

Your decommissioned equipment delivers tangible value in a high-demand market.

Where This Applies

This program is ideal for:

- Data center decommissioning projects
- Infrastructure refresh programs
- End-of-life or surplus equipment
- Large-scale server and storage environments

Why Maintech?

Choose Maintech to recover the full value sitting in your decommissioned IT. Our remarketing specialists combine deep market knowledge with a business-first approach, helping you recoup capital, simplify decommissioning, and meet sustainability commitments.
